I would like to request information regarding incidents of crime where the subject has been under the influence of khat or is suspected of being under the influence of khat or whether khat has been an aggravating factor in a crime.

I would like the individual incidences per year with the type of crime listed, the race and nationality of the person and also the year in which the event occurred.

In order to locate the information you requested, the MO notes in the crimes database was searched for the term 'khat'. No results were produced.

The incidents database was also searched for the term 'khat' and 6 incidents involving the drug khat were reported. Information on nationality and race is not recorded in the incidents database. Please note that these are reported incidents, not recorded crimes.
