

I write to request a disclosure under the Freedom of Information Act. I would like to establish the most accurate data available for

- a) the number of under 18s who have been arrested on suspicion of drink driving by Police in the last 5 years and**
- b) the youngest suspected drink driver arrested by police in the last 5 years.**

Please find below the number of arrests for drink driving offences. Where a person has been arrested for two offences on the same occasion, for example, driving with alcohol level above limit and failure to provide a specimen for analysis, the second offence has not been counted to give a better indication of the number of individuals arrested.
