

Please can you go ahead with the 2 answers you are able to provide outlined in bold for years 2009-2016

1) General stress related illness &

2) Over 6 months off

Within the request is it possible to provide no of Officers employed for those years separate so I can work out as percentages please

The following points should be noted and caution should be taken when interpreting these data.

- There is no way of excluding death of loved one as such. We have filtered out sickness details containing some appropriate words such as Bereavement & Death, however this may not include all absence due to Bereavement & Death (this would mean a manual search of each absence record)
- The number of officers sick is based on each calendar year. So if an officer was sick for 4 days from 30th Dec to 2nd Jan then they would appear in both years
- Absence for 6 months + data is per year calendar year also .however it is important to note that for example , if an officer has been off sick for 10 months (Aug to May) then they won't appear as they have not had 6 months off in the relevant Calendar year

Police Officer Sickness due to Psychological Related Illness 2009 to 2016

Data does not include absences of 2 days or less, or those clearly attributable to Bereavement

	2009	2010	2011	2012	2013	2014	2015	2016	Total
Total Officers with Sickness Absence	265	362	338	354	385	414	533	529	3180
Total Officers Absent for 6 months+	8	12	22	22	21	31	34	65	215

Police officer strength (Full time Equivalent) at 1st April from 2009- 2016

Year	Strength
2009	8610.45
2010	8600.1
2011	8129.45
2012	7798.6
2013	7472.7
2014	7148.3
2015	7003.0
2016	6761.5
