

Since the new grading system (P1/2/3/4/5/6/7/8) went live, could you present the following information as follows:

- 1) The percentage of P1 logs which were responded to in the allotted response time.
- 2) The percentage of P2 logs which were responded to in the allotted response time.
- 3) The percentage of P3 logs which were responded to in the allotted response time.

To clarify, when I say 'responded to in the allocated response time' I mean an officer 'arrived at scene' within the time frame given as per force policy for each grade of incident.
