

Can this data be from the five previous FINANCIAL YEARS (up to 2018-19) and not calendar years.
Also, when I ask for the data to be split up annually I mean 16-17, 17-18, 18-19 etc

1. How many youths (18 and under) were arrested on suspicion of committing sexual offences? - **555**

i. Which type of sexual offence was each arrested for (rape, disclosing sexual image, sexual assault, attempted rape etc)?

ii. What was the age of each suspect?

iii. What was the outcome for each (charge, caution, bail etc)?

Please see attached

Multiple offences are recorded against most offenders so where offences are listed this will not match the number of offenders.

2. How many sexual offences were reported by victims aged 18 and under?

2016/17	2017/18	2018/19
2196	2811	2769

i. How many of the above featured a suspect who was also aged 18 and under?

2016/17	2017/18	2018/19
948	1316	1222

* Could the information be divided up annually, please?

CLARIFICATION

I was after the total number of just suspects but also what happened to each one, as in one may have been arrested and then released with a caution or charged etc.
