

1. How many vehicles does your organisation own/operate?

1,386

2. Please categorise these into cars, vans, trucks and lorries and other?

See covering and attached (4881_attachment_02.pdf).

3. Please detail which departments in your organisation own/operate these vehicles?

See covering and attached (4881_attachment_02.pdf).

4. Please detail whether In-Car/Dash cameras are installed in any of these vehicles?

Yes, all of our traffic cars have in-car recording equipment

5. If the answer to 4) is yes. Please detail: i) the name and model number of the camera ii) the price paid for it and iii) where it was purchased from?

The cameras in our traffic vehicles are a mix of CCTV and ANPR cameras. An example of a CCTV camera we use would be a "Kestrel 18". An example of an ANPR camera we use would be a "PIPS P362".

Due to the age and number of vehicles we have in our traffic fleet, we may have a number of different cameras installed to the ones referred to above.

All of the equipment dates back to Operational Command Unit purchases. If a vehicle is written off or is due to be replaced by a new car, then all the camera equipment is removed and re-installed into the new vehicle.

The cameras are only a small part of the in-car system which would also include speed enforcement and blues / twos technology. When cameras are purchased, they are purchased as part of the whole system, so the individual camera price would not be known.

6. Does your organisation have any policy on use of Dash Car cameras?

Section 21 (see covering).

7. How many accidents were your organisation's vehicles involved in 2011, 2012 and 2013. Please detail these by year?

Accidents	
Year	Total
2011	1,630
2012	1,326
2013	1,315

8. Which car insurance company do you currently use to insure your fleet of vehicles?

Chartis Insurance
