

During the 2016 calendar year how many temporary fixed position speed cameras were withdrawn from service that were positioned at a site where a temporary speed limit had been introduced because of road maintenance? (This figure should include all those temporary cameras that were removed during 2016 but were installed at any time).

**One camera location**

For each of the temporary cameras referred to above please state:

a) When was it installed?

**July 2016**

b) When was it removed?

**November 2016**

c) Where it was positioned?

**It was positioned on the M6 Junction 8-7**

d) What was the original speed limit on the road?

**This is a motorway so national speed limit applies**

e) What was the temporary speed limit being enforced for the cameras?

**40mph**

f) How many speeding motorists were issued with fines during the period of the temporary speed limit reduction?

**10,048 from the cameras**

g) What was the highest speed or highest average speed recorded at this site and if known the make and model of the vehicle involved and the penalty imposed?

**110mph - BMW 330D XDrive AC Auto - This was a police car and exemption was applied.**

Please note that if this request would be better dealt with by another authority (eg your local speed camera safety partnership) then please forward it to them on my behalf.

For clarification purposes my question relates to temporary average speed camera systems used to enforce temporary speed limits as well as "normal" speed cameras. For average speed cameras please state the geographical start and end point of the cameras that monitored the stretch of road as well as the questions a, b, d, e, f and g above.
