

1. The number of accidental dog bites for the following financial years:

2013/14 = 5

2014/15 = 8

2015/16 = 1

2016/17 = 3

2017/18 = 2

2. The amount paid in compensation to victims of dog bites whereby the victim was not the intended target and where the keywords 'dog bite' appear in the summary field for the following financial years:

2013/14 = Nil

2014/15 = £2,000.00

2015/16 = Nil

2016/17 = £4,000.00

2017/18 = £3,000.00

Please note, the amounts above relate to the year in which the incident occurred and not necessarily relate to the year the payment was made.

It is also important to note with question 2 that a keyword search of the summary field won't necessarily capture all cases of dog bites.
