

Which three fixed position speed cameras in your area were responsible for (i) the issuing of the most fixed penalty notices to suspected speeders and (ii) were activated the most time by speeding vehicles in the combined three year period of 2016, 2017 and 2018?

Please provide me with the position of each of the three cameras and the number of FPNs issued as a result of it "catching" suspected speeders in that three-year period as well as the number of activations logged at that site.

NOTE: Please include average speed cameras for this analysis where the cameras have remained in the same position.

Please see below:

A38 Bristol Road Between Priory Road and Speedwell Road – 7204 activations - 7081 Notices issued

A4540 New John Street West Between Lucas Circus and Hospital Street – 6932 activations – 6711 Notices issued

A4540 New John Street West Between Hospital Street and Lucas Circus - 3751 activations - 3698 Notices issued
