

Could you please e mail the following information relating to the variable speed limits imposed on the M6 south bound between the hours of 1000 and 1600 on the 17/08/2019 between M54 and J10.

1. The displayed speed limits and the times and duration

**West Midlands Police do not deal with imposing speed limits, we can only say what we enforced**

2. The road conditions for the above

**Again we only enforce the cameras we do not look at the road conditions**

3. The traffic flow for the above

4. The number of offences committed for each period

**We enforced 7 offences during that time period above, and they were all for a 60mph speed limit.**

5. The reason for the displayed speeds
6. Were the displayed limits computer generated
7. Did an operative have overview of the displays

**No information held except for question 4 – you would need to contact Highways England for the answers to the remaining questions:**

<https://www.gov.uk/government/organisations/highways-england>

**West Midlands Police are an enforcement agency for the speed limit set, we do not operate the gantries or the speeds set. The road conditions and traffic flow are monitored by Highways England and the gantries set accordingly. When the speed limits are set we enforce the contraventions.**
