

Please could you provide me with a full list of motoring incidents which were a result of fatigued and/or tired drivers in your area, monthly from 2014 to 2019. Please could this information be broken down into the following categories:

- The number of incidents per month between 2014, 2015, 2016, 2017, 2018, 2019

Please see below data which only goes back to 2015 where Contributory Factor 1 was Fatigue

2015	2016	2017	2018	2019
1	14	16	17	17

- A count of actions taken per annum - for example, £9,000 in fines and 30 licence suspensions were issued in 2015

We are unable to provide details of fines / licence suspensions. Recording of outcomes in our database is not reliable, in addition fines and licence suspensions are issued by HMCTS not West Midlands Police
