

1. How many cases of stalking were recorded by your police force
 - a. 1st January 2018 – 31st December 2018 = **213**
 - b. 1st January 2019 – 31st December 2019 = **254**
2. Of these cases, how many of the named suspects had previously been named in reports of stalking against:
 - a. the same victim
 - b. multiple victims

From the cases identified above how many victims were repeat victims of stalking (please provide your definition of repeat victims)

We would need to look at anyone who is recorded as a suspect in all 467 crimes and then compare them to the named suspects in all stalking offences since it has been a recordable offence, for all those identified offences we would then need to compare all the victim names to see if either have previously been mentioned. This would exceed the FOI time limit.
