

Under the Freedom of Information Act 2000, please can you provide me with responses to the following, for each day since 1st January 2020 up until the day the response is answered:

a) The daily number of dispatches or visits to addresses where a member of the public was found to be dead on arrival at the address.

**376 logs where a resource was deployed to a sudden death**

b) The daily number of dispatches or visits to addresses where a member of the public was found to be dead on arrival at the address when the person in question had been flagged (either by other emergency services or in communication sent to the force) as a potential or known coronavirus sufferer.

**In order to locate and retrieve this information we would need to conduct a manual search of all of the above records to identify any deaths that were caused by Coronavirus / Covid 19, this would exceed the FOI time limit.**
