

Please can the force tell me how many calls it has received regarding breaches of Covid-19 laws in Coventry since legislation was passed/lockdown began?

Between 23/03/2020 and 22/07/2020 there were 3274 Covid related incidents recorded.

Please can I have a breakdown of what the breach was, street addresses of where it took place, and outcomes (i.e a fine was given, if so to what value) as well as number of calls?

In order to break this information down any further would exceed the FOI time limit, we would need to manually review each record in order to find out the nature of the breach and the outcomes. At 15 minutes per log that would be over 800 hours of work.
