

REQUEST

1a) How many of your vehicles were destroyed (by destroyed I mean damaged beyond economic repair) in 2019/20 following any kind of road traffic accident?

The total number of vehicle write offs from 01/04/2019 to be 56 vehicles of various make and models.

1b) what was the make and model of the most expensive vehicle that was written off?

BMW 330d x drive @ £48,718.63 inc vat.

2a) what was the total cost of this damage to your service because of the accidents referred to in Q.1?

£350,000

2b) if you were insured and suffered no direct cost other than through your insurance premiums, please provide me with a figure for the total value of those vehicles when written off.

Due to the different vehicles that are written off, Fleet work on an average cost per vehicle of 15K as we do not get full value on vehicles due to depreciation. Therefore 56 write offs @ 15K total cost is £840K.

3a) In the 2019/20 financial year, how many claims of compensation were paid to members of the public who were injured in a collision involving one of your vehicles?

89

3b) what was the total amount of the compensation? Please note that members of the public could be a passenger in your vehicle, a pedestrian or the driver/passenger in another vehicle.

Total paid out £337,665.73

Note: The question relates to the date the claim was paid irrespective of when the accident took place or when the claim was made.
