

I would like to request the number of police vehicles written off in 2019, including the type of vehicle and cost of its replacement if known.

The total number off write offs for calendar year 1st January to 31st December 2019 was 50 vehicles of various makes and models.

The most expensive vehicle during this period was a BMW 330d Xdrive at £48,718.63 inc vat.

The salvage return to Fleet was £322k.

Due to the different make/model of vehicles written off, Fleet Services work on an average of 15K. Total cost to Fleet to replace, 50 write offs at 15K = £750K.
