

Q1: To date how many fines have been issued for breaching Covid regulations? Please breakdown into types of breaches?

Between the dates 1 March 2020 and 31<sup>st</sup> October 2020 West Midlands Police have “recorded” 762 fines.

We were not required pre October 2020 the record type so those records are mainly blank, and to retrieve all the breach type would therefore exceed the cost element for the freedom of information act.

However for the ones that we do have recorded in October please see below for the type of breach.

- Gathering
- Movement
- General
- Face Covering
- Business
- Quarantine
- Failure to comply with a direction to return to the place required to self-isolate (regulation 5)
- Failing to request the information listed in Regulation 10(1) of the Regulations,

which includes things like the name of the individual; their telephone number and email address; the date and time they entered the premises.

Q2: How many £1000 and £10k fines have been issued and for what?

West Midlands Police have recorded 13 super fines £10k.

These are for the breach of covid guidelines.

If you perform a simple google search “west midlands police £10000 covid fines” you will see all the relevant data in press releases from the Force.

Q3: How many parties or large party gathering have the police broken up?

Between 1<sup>st</sup> March 2020 and 31<sup>st</sup> October 2020, West Midlands Police have attended in excess of 7000 incidents that could be construed as a “gathering”. We do not record our information in relation to a “gathering”. There are numerous reason as to why it could be considered to be a gathering for example, an incident initial report could be classed as:

Anti-social behaviour

Covid related

Administration

Crime related

Transport related

Abandoned Call

These are only a few examples of how a gathering could have initially been recorded. Therefore to retrieve this data would require a manual search of all the records to see if it applies to your request.

This therefore exceeds the cost in relation to the Freedom of Information Act.

Q4: How many protests have the police been notified of or attended, please provide details?

There were 157 recorded (notified or attended) protests recorded between 1<sup>st</sup> march 2020 and 31<sup>st</sup> October 2020.

The details are as follows:

I'm really concerned about the anti-abortion protest on the corner of Station Road and Franklin Road. They do not practice any social distancing and it is not clear why they are there. Currently it's just two masked men standing outside an abortion clinic which is really intimidating. They also only started this morning at the same time as the pupils from Kings Norton Girls School started walking to school which is very manipulative.

Planned Protest for 1145hrs near primark. 30 to 40 expected. This is to do with Nigerian Police brutality. Low risk by FORCE. For passing attention
