

How many cannabis scenes the West Midlands police have held in the last twelve months and an average of time spent at the scene.

Our data are not organised in such a way as to allow us to provide this information. Many incidents relating to Cannabis are originally recorded as something else such as Burglary for instance, Cannabis is often only discovered at a later stage. A search just for Cannabis will return hundreds of logs for people smoking Cannabis or on street possession offences. We would need to conduct a manual search of all relevant records in order to locate and retrieve this information which would exceed the FOI time limit.

And a second request for how many scenes the ' West Midlands Cannabis Disposal Team' were deployed to.

CDT attended 375 jobs in the previous year.
