

1. For the years 2018, 2019, and 2020, please provide me, if possible, with the number of people with developmental disabilities/neurodivergent conditions (which may include but is not limited to autism spectrum disorder, Aspergers, ADHD, Tourette Syndrome, and intellectual disabilities) that have been arrested by West Midlands Police.

In order to locate and retrieve this information we would need to conduct a manual search, which would exceed the FOI time limit.

2. For the years 2018, 2019, and 2020, please provide details on staff training in relation to dealing with people who have developmental disabilities/neurodivergent conditions. Please provide information on when each training session occurred and how long for, which person or organisation delivered each training, the form the training was delivered in, how many police officers attended each training, and whether the training was mandatory. Please also provide any training materials received by officers and any other documents pertaining to the training.

The data provided is the only information we are able to locate within the FOI time limit. Please note: Our course titles and especially in 2018 don't reflect the descriptors given, therefore we have searched under "Neuro" "Autism" "Autistic" "learn" and "Dyslexia" "Asperger" "ADHD" and "Tourette", not all searches returned data. None of the courses are mandatory.

Course title	Year	No trained	Type of training
Autism and the Criminal Justice System	2018	1	MLE
All about Autism	2018	2	MLE
Autism and the Criminal Justice System (CJS) Advice Booklet	2018	2	MLE
