

- The number of missing people reported to West Midlands Police from March 2020 to today's date (26/07/21) and their ethnicity.

**17,775 missing records****Asian - 2140****Black - 3551****Chinese, Japanese, South East Asian - 108****Middle Eastern - 400****Unknown - 67****White North European - 10,440****White South European - 436**

- Of these missing people reports, I would also like a breakdown of whether they were actioned by police within 24, 48 or up to 72 hours, with a further breakdown by ethnicity.

**We would need to conduct a manual review of all relevant records in order to locate and retrieve all of the requested information, which would exceed the FOI time limit.**

- I would also like a breakdown by ethnicity of the initial level of perceived risk (high, medium or low) under which each report was categorised.

**When trying to break down the risk level, our database only shows what the final risk level was and not initially. For example: It may be that a record is initially graded as medium, then throughout the investigation raised to high. In order to see the initial grading each record would need to be reviewed in order to locate and retrieve all of the requested information and this would exceed the FOI time limit.**

- How many people reported missing between March 2020 and today's date (26/07/21) were found with a breakdown by ethnicity.

**17,553 found records****Asian - 2129****Black - 3492****Chinese, Japanese, South East Asian - 90****Middle Eastern - 399****Unknown - 66****White North European - 10,311****White South European - 424**
