

1. The number of individual reports of suspected drink spiking made to West Midlands Police by members of the public in the period between 01/01/2021 and 31/12/2021 (or the most recent 12-month reporting period) - **387**

2. The number of urine or blood samples collected for testing from suspected victims of drink spiking between 01/01/2021 and 31/12/2021 (or the most recent 12-month reporting period).

During the period 1/10 to 19/1 WMP collected 190 urine samples.

3. The number of these collected samples that were tested and the number that were discarded without testing.

No samples have been discarded to this point. All 190 have been initially screened/tested and a further 8 sent for forensic analysis.

Please note: We only started collating this data from 1/10/21 and the above responses for questions 2 and 3 are relevant for this period. We cannot provide data for these two questions for 1/1/21 – 30/9/21.
