

Thank you for your previous response regarding NRM data and cannabis cultivation. It certainly is very much appreciated and a valuable contribution to the project. In order to keep my investigation up to date and relevant, using the details below, could I please have the data from 2022.

I am currently conducting an exploratory study to investigate the relationship between Albanian nationals and cannabis cultivation in the UK. Using data from NRM referral records, could you please inform me of the number of NRM referrals, broken down into nationalities, which concern cannabis cultivation. Could I please have the data from 2022 presented in a similar format as seen below.

Please note: Data has been extracted from the West Midlands Police NRM Tracker on 21/03/2023. This is a live system so figures may change slightly over time.

The data does not include figures for Duty to Notify referrals relating to Cannabis cultivation.

According to the Single Competent Authority (SCA) allocation criteria, not all cases allocated to West Midlands Police relate to exploitation within our force area.

The figures include NRM referrals from all first responders, not just those submitted by West Midlands Police.

If any person has dual nationality this is not captured within our records.

2022	
Nationality	Number of NRM Referrals re: Cannabis Cultivation
Albania	154
