

ORIGINAL REQUEST

I would like to request statistics on the number of accidents in Earldson, especially the new 20mph zone for the following:

1. Years 2015 - 2024
2. Total number of accidents
3. Total number of minor injuries from the total
4. Total number of major injuries from the total
5. Total number of deaths from the total.

REFINED REQUEST

Within the cost limit we could search for data from 2016 onwards, however please note that 2024 data is not currently available. In addition, please note unfortunately our data recording system doesn't break the data down to determine the MPH on each road, therefore we could provide a list of roads showing where the accidents occurred.

We would only be able to search for injury data as the non-injury data is not accurate and may include duplicate records.

We have provided all the data we have been able to retrieve regarding this request, unfortunately as previously mention our recording system doesn't break the data down to determine the MPH on each road. We have enclosed a spreadsheet showing the roads the accidents occurred on.

We have only included the injury data as the non-injury data is not accurate and would potentially include duplicate records to the injury data.

The first map is a blank one without points on. The second map is KSI data which has been pulled from CMPG which is from 2016 as the earliest date that can be pulled. The third map is all injury collisions from 2019 onwards.

No fatal accidents were recorded

2024 data is still being processed therefore, currently there are no accidents recorded for this area in 2024.

Collision Year	Slight Injury	Less Serious	Moderately Serious	Serious	Very Serious	Total
2016				1		1
2017				3		3
2018				4		4
2019	21		1	2		24
2020	10	1	2			13
2021	17	2	1			20
2022	11	1				12
2023	3					3
2024						0
